BOLWELL RV

AIR

www.bolwellrv.com.au

Why the AIR should be your next tourer

If you are looking for an affordable way to explore Australia, the solution is delivered in the Bolwell AIR Compact Expandable Camper.

The AIR is a compact caravan created from an innovative design and advanced construction which makes it both lightweight and aerodynamic. It meets three very important criteria for those preparing to take to the road: it is stable, safe and economical to tow.

A Five Star A-Frame Camper

The idea of a simple A-frame camper is not new, but the AIR is like no other on the market today. It ticks boxes that other expandable camper trailers simply cannot – because it has been designed by true innovators.

* Content of this brochure refers to both features and options on the AIR. Please refer to specification and options list for accurate inclusions.
